SUPERMARKET

RETAIL APPLICATION

Model 600

SMALL OPENINGS & LIGHT TRAFFIC

Use the Model 600 ABS door or the Model 500 aluminum door for an economical solution. The Model 700 HDPE is also available, but not shown.

Model 110

DOUBLE ACTING TRAFFIC DOORS

Mix and match your store needs for double acting traffic doors.

CQP doors are available in single or double panel.

Reduce your costs by using heavier models in larger openings and lighter models in smaller openings.

Model 500

FLEXIBLE DOORS FOR BACKROOMS

The model 110 is a 2 ply textured PVC door with gravity actuated hinges. Multiple colors are available.

LARGE OPENINGS HEAVY TRAFFIC

Use the Model 901 or Model 1000. These doors have an insulated structural aluminum frame and optional teardrop bumpers or impact plates. These doors are 1" or 1 3/4" in thickness. Standard features for these models include V-cam hinges and 10" bottom jamb guards. The Model 1000 works great for fork lift traffic.

Model 1000

Model 990R

CONSISTENT DESIGN FOR SMALL & LARGE OPENINGS

When you must have consistency, the Model 990R is a good choice. This is a solid core door with the option of teardrop bumpers or impact plates. The 990R has a variety of solid color ABS facings. Aluminum and stainless steel faces are also available. The maximum height is 96". This supermarket door is the most versatile model available. The Model 990R is available with or without a full perimeter gasket. The door can be modified to meet your needs.

Model 990R Traffic Doors are shipped FOB Factory.
